

Advanced Cybersecurity Professional Training

Master the art of cyber defense in **4 to 6 months**. Equipped with AI integration, hands-on projects, and real-world threat simulation.

TARGET AUDIENCE

 Plus Two Students

 Degree Students

 IT / Non-IT Background

 Career Switchers

 Hacking Enthusiasts

Launch Your Career with High-Paying Roles

100% Placement Assistance & Exclusive Internship Opportunities provided upon completion.

SOC ANALYST

Monitor, detect, and respond to security incidents.

₹4L – 10L /yr

NETWORK SEC ENG.

Implement and maintain secure network infrastructure.

₹5L – 15L /yr

VAPT SPECIALIST

Ethical hacking and vulnerability assessments.

₹6L – 18L /yr

CYBER DEFENSE OFFICER

Lead incident response and manage risk.

₹8L – 25L /yr

12 COMPREHENSIVE MODULES

01 Intro to Ethical Hacking

Skills: Kill chain, InfoSec fundamentals, TTPs.

AI: Automating threat detection.

02 Footprinting & Recon

Skills: OSINT, Maltego, Shodan intelligence.

AI: ShellGPT & ChatGPT for recon.

03 Scanning Networks

Skills: Nmap, Hping, network mapping.

AI: DeepExploit automated scans.

04 Enumeration

Skills: SNMP, LDAP, SMB enumeration.

AI: Scripting automation via AI.

05 Vulnerability Analysis

Skills: Nessus, OpenVAS identification.

AI: AI-driven prioritization.

06 System Hacking

Skills: Hashcat, Password cracking, Escalat.

AI: Accelerated cracking logic.

07 Session Hijacking

Skills: MITM, Ettercap, session analysis.

AI: Automated traffic inspection.

08 Hacking Web Servers

Skills: Apache/IIS flaws, Hardening.

AI: Detecting misconfigurations.

09 Web Application Sec

Skills: OWASP Top 10, XSS, CSRF, ZAP.

AI: AI-driven fuzzing & injection.

10 SQL Injection

Skills: sqlmap, mitigations, detection.

AI: Automated SQL injection.

11 Wireless Hacking

Skills: Rogue AP, Aircrack-ng cracking.

AI: Encryption pattern prediction.

12 Cloud Computing

Skills: AWS/Azure, Container security.

AI: Cloud-native vulnerability detection.

SPECIALIZATION TRACKS

BLUE TEAM (DEFENSIVE)

- ✓ **SIEM (Wazuh):** Deploy Wazuh SIEM, monitor events, log analysis and compliance monitoring.
- ✓ **Malware Analysis:** Perform static and dynamic analysis of software behavior.
- ✓ **IDS:** Set up and fine-tune traffic detection solutions and anomalous pattern detection.

RED TEAM (OFFENSIVE)

- ✓ **Pentesting Report:** Full-scale testing and drafting comprehensive remediation strategies.
- ✓ **Bug Bounty:** Master hunting workflow for platforms like HackerOne and Bugcrowd.
- ✓ **Exam Prep:** Focused CEH v13 mock exams and actual testing environment simulation.

CAREER DEVELOPMENT

Resume Guidance

Profile optimization for top global cybersecurity recruiters.

Portfolio Building

Documenting scripts, research projects and vulnerability findings.

Interview Prep

Technical and HR coaching for complex security scenarios.

Bridge from Learning to Earning

Guaranteed Internships

Gain hands-on experience in live production environments to build real-world credibility.

LinkedIn Optimization

Professional profile building and resume structuring to attract top recruiters.

100% Placement Support

Dedicated technical and HR coaching until you secure your high-paying security role.

GitHub Portfolio Building

Prove your capability. Document vulnerability research and security scripts for global employer review.

```
> git commit -m "Secured future"
> git push origin career
```

PROGRAM OUTCOMES

- ✓ Industry-standard pentesting methodologies across web & cloud.
- ✓ Implement defensive response and real-time monitoring.
- ✓ Pass CEH v13 certification and present professional portfolios.

Empowering security researchers through AI-augmented curriculum and expert mentorship.
